This documentation includes references both to some *local objects* (page 3) and some in another document ([[sphinx-doc-b](#)], page 3). It even refers to some parts of an ordinary LaTeX document ([[latex-doc](#)], page 1)!

See [AnInternalClass](#) (page 3) for a locally defined object and `SomeExternalClass` ([[sphinx-doc-b](#)], page 3) for one defined in another document (via `intertext`). Also see `str`¹ for one found by `Intersphinx`.
